

The one bimodal case: galaxies, seed 105

targeted median 67.40, 90 % [60.92, 72.96], half-width 6.02

popuni median 68.90, 90 % [62.80, 73.06], half-width 5.13 $\text{km s}^{-1} \text{Mpc}^{-1}$

the wide targeted interval is the honest reading of a posterior whose 90 % has to span the gap between two modes
